Date: 6 July 2022

Real World AI Project

IMPACT

In this challenge, more than 30 change makers from all over the world collaborated for 8 weeks to build the AI solution

Omdena

The Project:

Using Statistical Correlation And Cluster Analysis to predict the relationship between Triggers and Symptoms on Hashimoto's Disease

CERTIFICATE OF ACHIEVEMENT

THIS IS PRESENTED TO

William Green

| ML Engineer

For collaborating in the Omdena AI challenge with impact start-up Hashiona for more than two months. The team came together to collaborate and develop solutions to understand triggers and symptoms of Hashimoto's disease. The team extracted user data from the App, consolidated the data, did extensive data exploration, arriving at statistical analysis and clustering models for triggers and symptoms for Hashimoto's disease.
